SIXTY-FIRST REPORT OF THE REGISTRAR-GENERAL ON
THE VITAL STATISTICS OF QUEENSLAND FOR THE
YEAR 1920.

Presented to both Houses of Parliament by Command.

TO THE UNDER SECRETARY, HOME DEPARTMENT.

SIR,—The 1920 Annual Report on Vital Statistics for the State of Queensland is herewith presented, the following tables enumerating and classifying the births, marriages, and deaths which occurred during the year. The mean population has been estimated at 734,379, and the birth, marriage, and death rates have accordingly been based on this figure.

The births during the year numbered 20,257, being the highest ever recorded in this State. This is an increase of 92 over those recorded in 1915, the next best record. These births comprise 10,537 male children and 9,720 female children. The number of illegitimate births was 562 males and 455 females. The number legitimated was 78 males and 66 females. There were 201 multiple births, including 195 male and 199 female twins and 7 male and 5 female triplets. The birth rate for 1920 was 27.58.

There were 6,670 marriages—another record for this State—being an increase of 529 over those registered in 1915, the next best year.

The religions of the various grooms and brides were as follows :—Church of England, 2,029 ; Roman Catholic, 1,439 ; Methodist, 1,117 ; Presbyterian, 893 ; other denominations, 1,007 ; and by Registrars, 185. 213 males and 1,379 females under twenty-one years of age were married during the year. The marriage rate for 1920 was 9.08.

The deaths numbered 7,946, being a decrease of 914 on those for 1919, the year in which “Pneumonic Influenza” epidemic swept through the State. Organic Diseases of the Heart, as in past years, claimed the largest number of victims, viz. :—922 ; followed by Diarrhoea and Enteritis under and over two years, 708 ; Cancer (all kinds), 592 ; Congenital Debility, &c., 562 ; Senile Debility, 486 ; Tuberculosis (all parts), 377 ; Bright’s Disease, 326.

It is gratifying to be able to record a substantial reduction in the death rate of children, the rate having dropped from 72.4 per 1,000 of births in 1919 to 64.4 in 1920. The establishment of Baby Clinics with competent nurses, who instruct young mothers in the most important duties of motherhood—the care and welfare of the new-born infants—no doubt would account for this improvement.

REVENUE.

The total amount of Fees collected during the year was £1,854 3s. 7d. Of this amount £1,134 10s. was collected in the Brisbane Office.

Acting Registrar-General.
